WORKING
PAPERS

Agenda

- SV 04 Campaign Objectives
- CTF Blue/CFMCC Missions & Commanders' Intent
- Command Arrangements
- CONOPS
- Selective Comparison of Current vs. 2015(+)

SV 04 Campaign Objectives

- **Main Effort**: **Assess future sea-based MEB capabilities in a Joint Forcible Entry context**

- **Supporting Efforts**:
  - **Assess Joint Force Maritime Component Commander (JFMCC) and MEB C2 relationships, architectures, and emerging Joint (component and JTF) / Naval C2 systems**
  - **Assess ISR capabilities required to support EMW (e.g., reach back, Joint ISR integration, etc.)**
  - **Assess the ability of a future MEB to provide a Standing Joint Task Force-Forcible Entry (SJTF-FE) capability**
  - **Assess the mix of platforms and connectors within the sea base**
  - **Assess proposals for sustainment of a sea-based MEB and Reception, Staging, Onward Movement and Integration (RSO&I) of Joint Forces**
  - **Support refinement of JFEO Joint Enabling Concept and CONOPS**

DRAFT
WORKING
PAPERS

CTF Blue Mission Statement

When directed, CTF BLUE conducts operations to enable GOI and Coalition forces to reenter the Caliphate in order to restore GOI's territorial integrity. O/O provide support for follow-on operations.

CTF Blue Commander's Intent

Purpose: Restore GOI territorial integrity by enabling Government and Coalition forces to reestablish control over the Caliphate, ensuring access throughout the region.

Method: We conduct forcible entry operations using a combination of sea based, theater, and out-of-theater forces to overcome the lack of infrastructure in the operations area. After securing necessary lodgments, we will expand combat power ashore to decisively defeat remaining enemy forces and remove the threat to regional access. We will then facilitate the introduction of GOI forces and return control to the GOI.

Endstate: Straits of Malacca open to free navigation, Government/Coalition forces established within the Caliphate, restoration of territorial integrity, and control transferred to GOI.

CFMCC Mission Statement

On Order, CFMCC forces conduct Joint Forcible Entry operations in order to restore regional freedom of navigation and reestablish GOI territorial integrity.

DRAFT
WORKING
PAPERS

CFMCC Commander's Intent

Phase I (Forward Presence): As the CTF BLUE main effort, we will close forces within the JOA as rapidly as possible, establish the seabase, and set the conditions for Phase II (Joint Force Advance Force Operations). We will deceive the enemy into believing that our main assault will be directed towards Padang by conducting an amphibious demonstration, vicinity Sibolga.

CFMCC Commander's Intent (Con't)

Phase II (Joint Advance Force Operations): As the CTF BLUE main effort, we will continue to close forces within the JOA as rapidly as possible and set the conditions for Phase III (assault). We will neutralize enemy threats to access, to include (but not limited to) mines, submarines, coastal defense cruise missiles and air defense weapons. We will coordinate with the CFACC to support establishing and maintaining air/space superiority while we establish and maintain maritime superiority by defeating the enemy's ability to interdict maritime forces within the JOA. Simultaneously, we will delay, disrupt, and neutralize select enemy gound units to prevent their successful reaction to our pending assault. Our actions will include but are not limited to: selected strike operations; clandestine insertion of SOF for reconnaissance, surveillance and direct action; information operations; and activities that facilitate assembling, closing, and employing the force. Key among our actions will be to eliminate the threat of enemy coastal defense cruise missiles located at CFMCC Obj 1 (Siberut Island), CMFCC Obj 2 (Mukomuko), CFMCC Obj 3 (Palau Bintan), and CFMCC Obj 4 (Airbangus).

DRAFT
WORKING
PAPERS

CFMCC Commander's Intent

Phase III (Assault). As the CTF BLUE main effort, we will initially conduct an amphibious feint towards CTF BLUE Obj A (Padang) making the enemy believe that Padang is the focus of our main attack. Near simultaneously, we will conduct assaults against CTF BLUE Obj B (Dumai) and CTF BLUE Obj C (Rengat) IOT seize lodgements for follow-on forces. We will fix the 1st Mech Bde preventing their movement and reinforcement towards Pekanbaru and Rengat.

Phase IV (Enabling/Decisive Operations): CFMCC remains the main effort. We will continue the attack to seize CTF BLUE Objective D (Pekanbaru) and open the port/airfield vicinity CTF BLUE Objective A (Padang) for use by follow-on forces. We will maintain maritime superiority while also providing sea based sustainment for forces ashore.

Phase V (Transition): Omitted for SV 04

-Attack to seize the airfield vic Rengat

-Screen avenues of approach from East to West and interdict enemy forces

P:

-Allow the airfield's use in support of the Phase IV attack on Pekanbaru

- Prevent enemy movement towards

CFMCC Phase IV CONOPS (Enabling/Decisive Operations

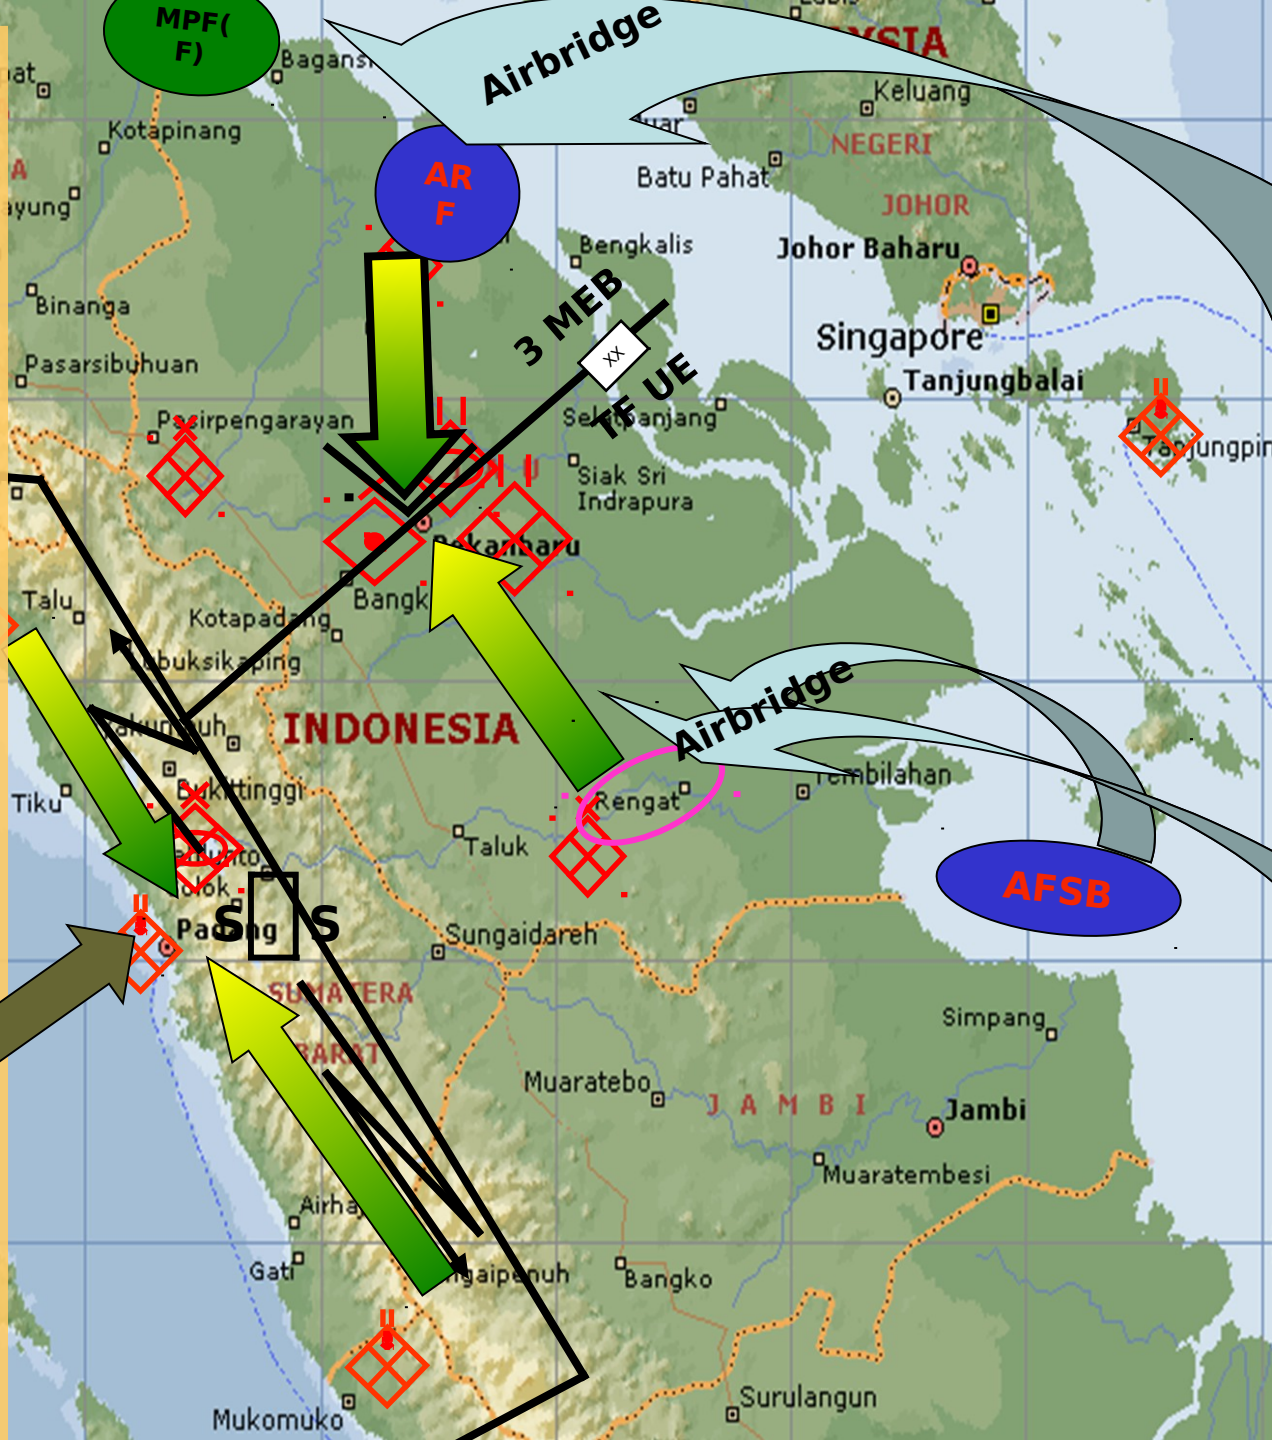
T:

-CFMCC executes a coordinated air and ground attack on enemy forces vicinity CTF Blue Objective D (Pekanbaru)

-TF South attacks and seizes the port and airfield vicinity CTF Blue Objective A (Padang)

-Fires UA flows through the port and airfield, vicinity Padang

P: Eliminate resistance and topple the Ibn Ander regime. CFMCC sets conditions for Phase V (transition to GOI control)



What's Different?

DRAFT
WORKING
PAPERS

2004

- **Planning**
  - Deliberate
  - FBO Restraints
  - Reliance on Allied/Coalition Infrastructure
  - Deliberate Force Closure
  - "Standard" amphibious assault
- **Capabilities**
  - Restricted Seabased Capability
  - RSOI
  - Reliance on fixed ports and airfields
  - Reliance on allied/coalition infrastructure support
  - Legacy C2
  - Legacy Munitions
  - Legacy Platforms

2015 Baseline/2015(+)

- **Planning**
  - En Route Planning (JEMPRS-NT)
  - WAN
  - MEB Fwd deployed within each ESG allowing the RCC a direct tether to an assigned MEB
  - Use of FDO (more latitude for the RCCs)
  - Less reliance of fixed land bases
  - Less reliance on Allied/Coalition infrastructure
  - STOM
  - ONA, CIE
- **Capabilities**
  - Self-Deployment
  - At sea arrival and assembly
  - At sea transfer
  - Compressed RSOI
  - Selective Off-Load
  - Employment of Seabased forces
  - OTH assault
  - Advanced Munitions (Loitering Capability)
  - Directed Energy Weapons (microwave/laser)
  - Distributed Operations (DO)

What's Different? (Con't)

Air-Assault Brigade Combat Team-Afloat

Using Container Ships as Afloat Forward Staging Base (AFSB)

Capabilities provided to JFC

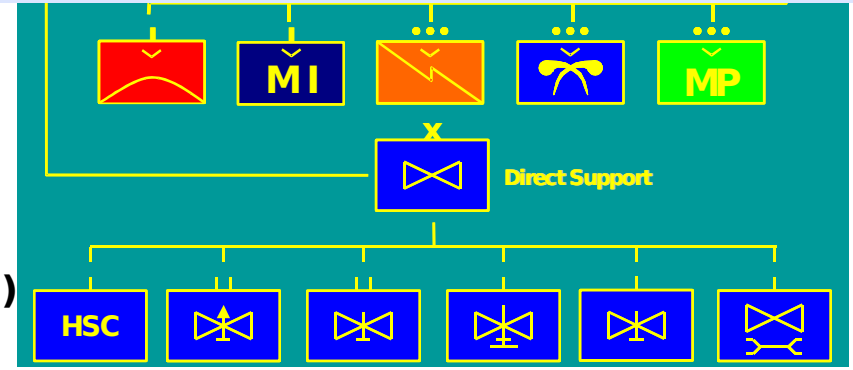
- Useful in a forcible entry environment
  - Complements and reinforces MAGTF
  - Increases vertical maneuver capability
- Capability to conduct vertical maneuver
  - 110 naut mi / 126 stat mi in 50 hours
  - 200 naut mi / 230 stat mi in 80 hours

Peacetime Disposition

- 1 ship fully operational w/ AASLT TF-afloat in EAL
- 3 ships w/equip at Diego Garcia (incl helos)

Ship Characteristics

- Converted container ship
- 1000 ft helicopter launch deck
- 30 helicopters / 1,000 soldiers
- 6 – story office space (TOC)
- Dry cargo area
- Area for ammunition



Personnel

~ 4,000

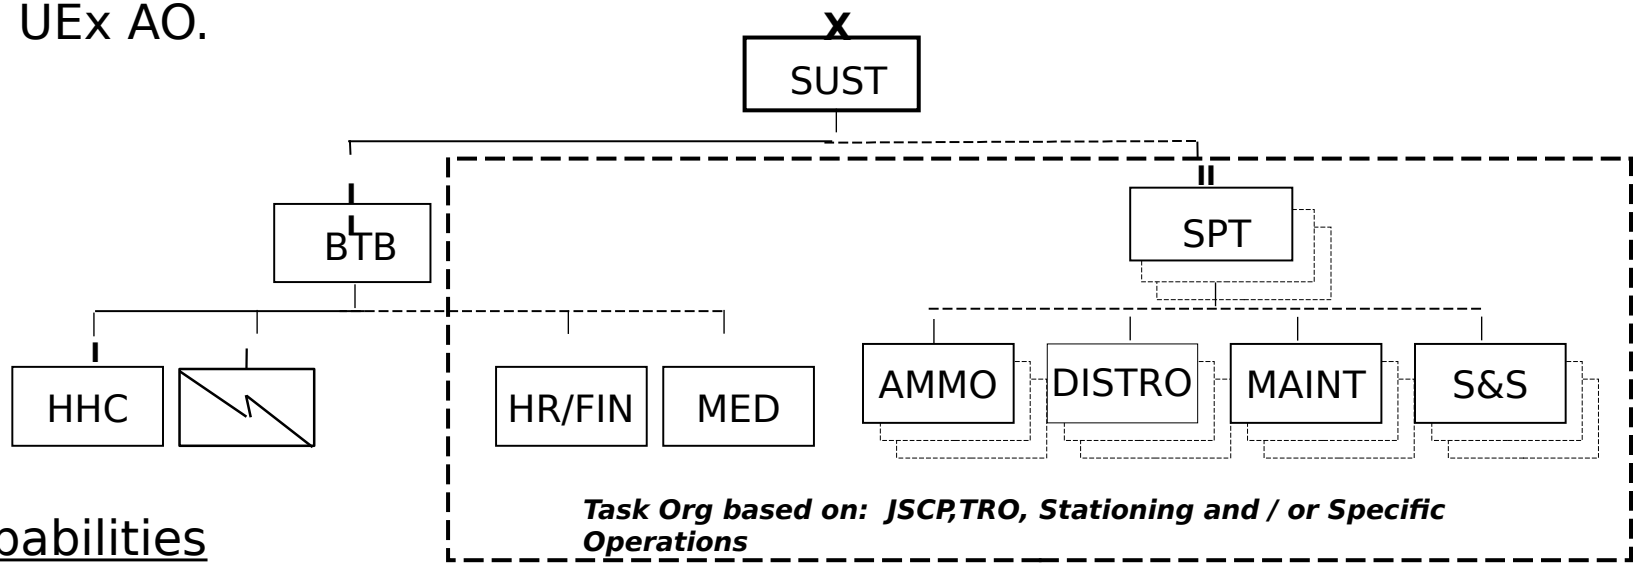
Sustainment Brigade

DRAFT WORKING PAPERS

Mission: Plan, prepare, execute and assess CSS operations within a UEx AO.



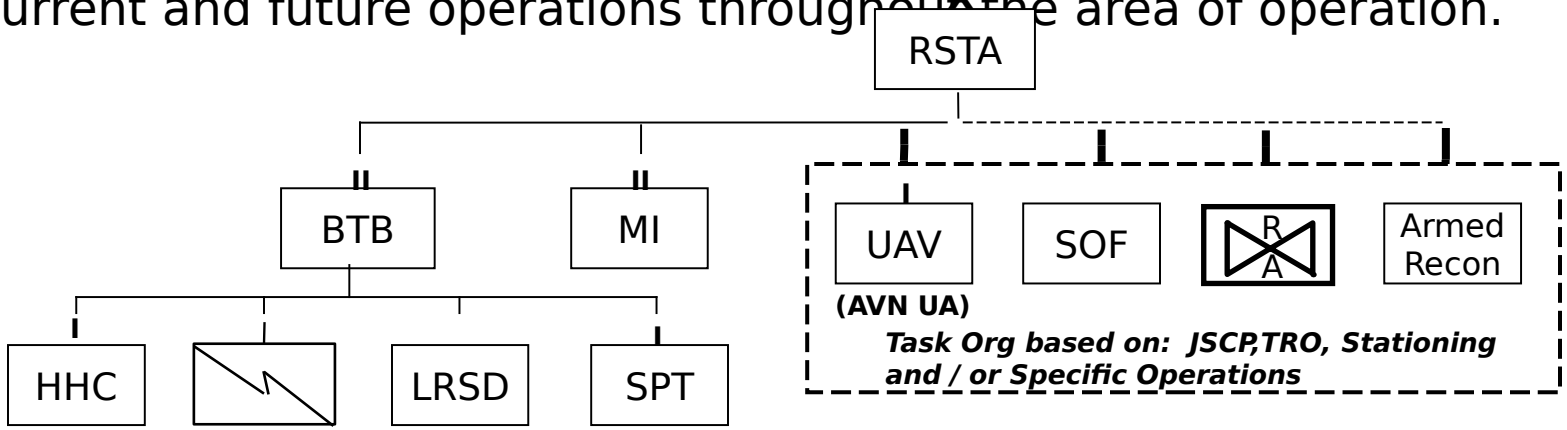
Capabilities

- Conducts host nation support and limited reconstitution.
- Configures for, distributes to, and retrogrades to and from maneuver UAs, other Support UAs, and to joint, interagency and multinational elements.
- UEy force pool provides Level III medical care / CL VIII resupply on area basis.
- Provides field level and selected sustainment level maintenance.
- Provides financial management, procurement, and contracting support to UAs as directed by the UEx.
- Provides postal, replacement operations, strength management, casualty

DRAFT
WORKING
PAPERS

RSTA Brigade

Mission: Plans, prepares, executes and assesses reconnaissance, surveillance, target acquisition and intelligence operations to enable the UE, Joint, service, functional, or multinational headquarters to focus joint combat power and effects with precision to simultaneously support current and future operations throughout the area of operation.



Capabilities:

- Theater-focused – cultural understanding / target smart
- Multi-disciplined - SIGINT, HUMINT, IMINT, MASINT, Surveillance & Reconnaissance
- Joint Enabled - access, visibility, control (via DCGS-A)
- Plans and executes the R&S plan for the UEx Commander
- Covers the space not assigned to another subordinate UA
- Enables situational understanding

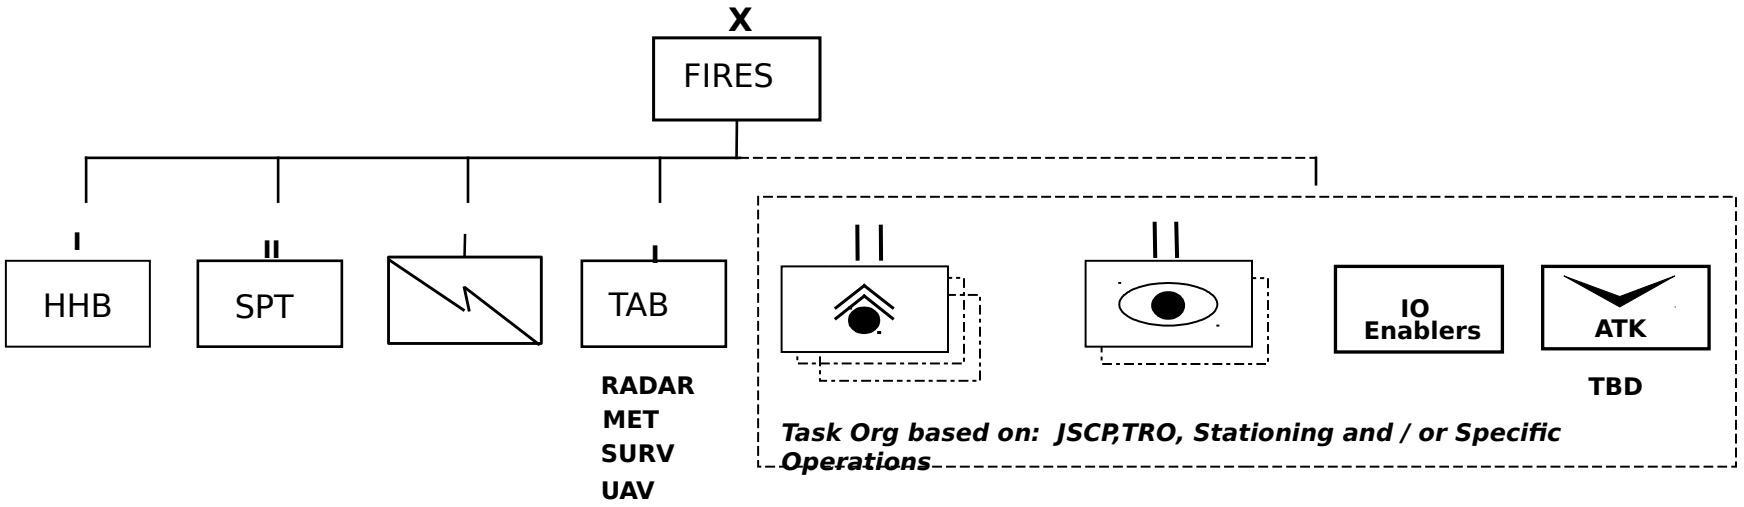
Fires Brigade

Mission: Plan, prepare, execute and assess combined arms operations to provide close support, counterfire and precision strike for JFC, UE, maneuver UAs and support UAs employing joint and organic fires and capabilities.



Capabilities:

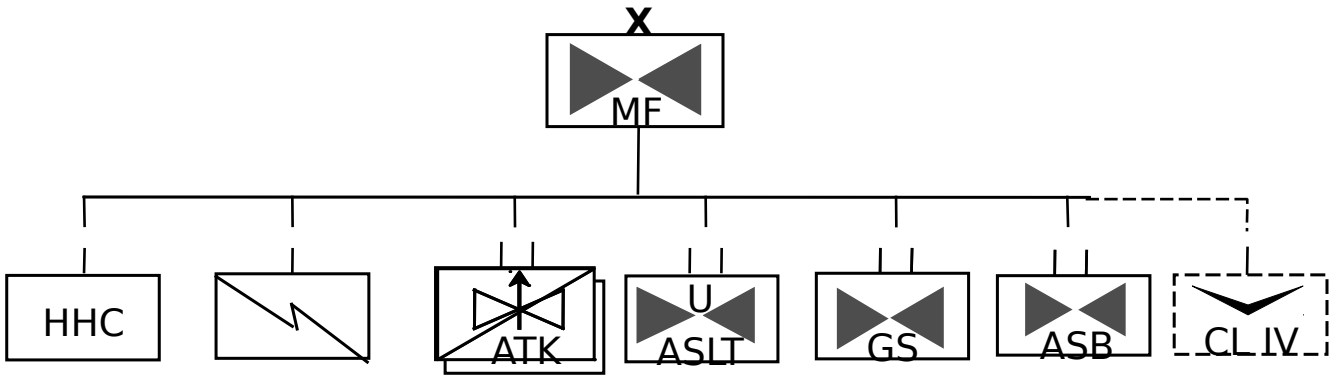
- Enables integrated employment of Army and joint surface-to-surface, air-to-surface, subsurface-to-surface, lethal and non-lethal fires, coupled with A2C2, and ground maneuver.
- Conducts close support, counterfire and precision strike using joint and multinational capabilities to destroy, fix or isolate enemy capabilities or forces

Aviation Brigade

Mission: Plan, prepare, execute and assess aviation and combined arms operations to support UEx and maneuver brigade scheme of maneuver to find, fix, and destroy enemy forces at the decisive time and place.

HVY
AH – 48
UH – 38
CH – 12
HH – 12

IN
OH – 60
UH – 38
CH – 12
HH – 12

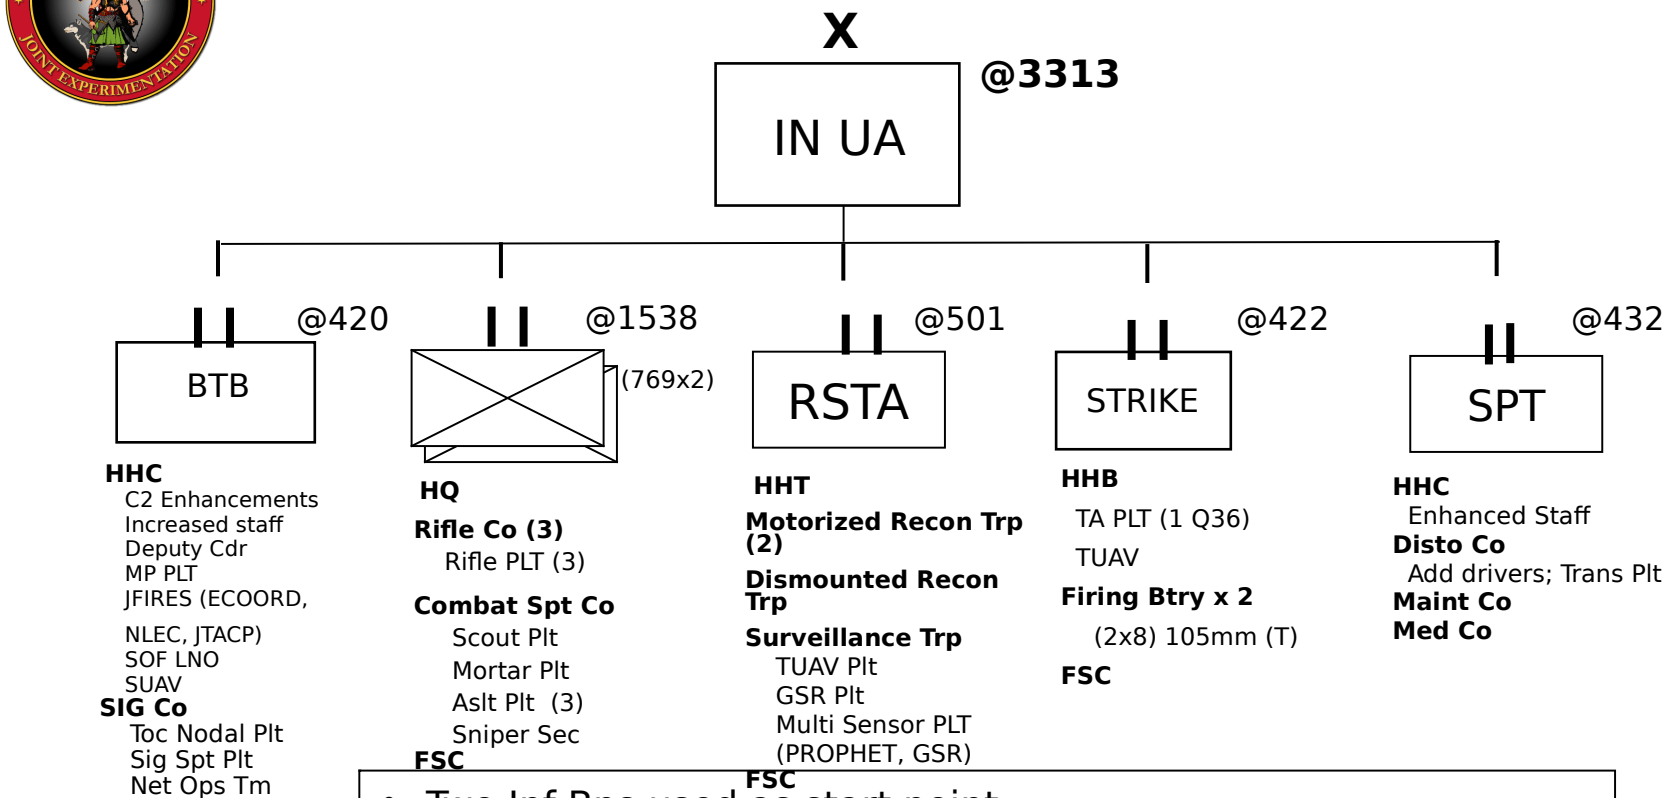


Capabilities:

- Conducts counter-recon, screen, close combat support, mobile strike, air assault, BCOTM, aerial sustainment, and A2C2 for UEx and UA.
- Conducts reconnaissance to provides information for the common operational picture (COP) for UEx and subordinates.
- Combat radius of 150 km
- Contributes to ability of maneuver brigades to maneuver out of contact

DRAFT
WORKING
PAPERS

Infantry Unit of Action

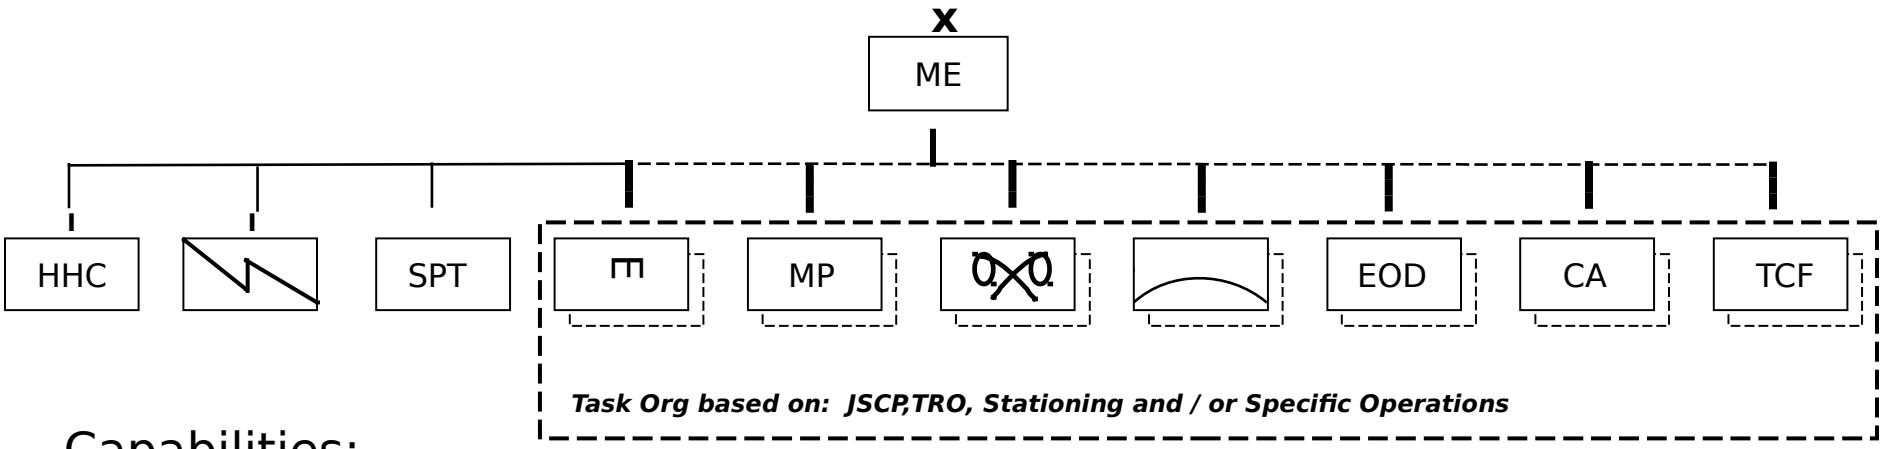


- Two Inf Bns used as start point
- Provides LRAS3-equipped Recon Capability
- Applied current systems to enable “Quality of Firsts”
- ISR teams: Brigade TUAV, Prophet, GSR, SUAV, Bde Recon Squadron w/2 Mounted Recce Trp, 1 Dismounted, 1 Surveillance Trp
- Infantry Squads: 72 (54 Rifle, 18 Weapons) Sniper: 3 (10man Tms)
- Infantry: 744 (72 squads x 9 + 12 wheeled assault squads x 8)

Maneuver Enhancement Brigade

DRAFT WORKING PAPERS

Mission: Plans, prepares, executes and assesses protection missions for UE, joint, service, functional and multinational headquarters. Executes limited offensive, defensive, and stability missions to prevent or mitigate the effects of hostile actions or environments throughout an assigned AO to preserve tactical or operational freedom of action.



Capabilities:

- Provides NBC, AMD, MP, and engineer capabilities to supported HQ and other UAs.
- Conducts area security, rear area and base security, and JRAC functions.
- Establishes linkage to the emerging Protection Joint Functional Concept
- Fuses the elements of protection
